        - Disable Dual Mode
        - Set Time Delay
        - Set TDO User
        - Audit (Optional USB Adaptor & Software Needed)
    d. Manufacturer's default Super Code: 1-1-1-1-1-1

2. System Connection and Test
    a. Connect Entrypad to the Lock body using the provided 4-wire lock cable.
    b. Install a 9v alkaline battery in EntryPad
    c. Open the lock using the Super Code 1-1-1-1-1-1

3. Change the Super Code (ID00)
    a. Enter "0" six times. One beep sounds.
    b. Enter the old code. One beep sounds.
    c. Enter a new six (6) digit code once. One beep sounds.
    d. Re-enter the new six (6) digit code. One beep sounds, indicating that the codes entered in step c and d are the same and the code has been changed successfully.

e. If three beeps sound, the code changing process failed. The existing code is still valid. Repeat steps a through d.

Note:
- User Code can't be 000000 or 999999.

4. Dual Mode (Open lock with Manager Code plus one User Code.)
   a. Enter Super Code and hold down last digit of code until two beeps sound.
   b. Press button "8" to set lock to Dual User Mode.

5. Single Mode (Open lock with single user code.)
   a. Enter Super Code and hold down last digit of code until two beeps sound.
   b. Press button "0" to set lock to Single User Mode.

6. Set Time Delay and Time Window
   - Time Delay: A time period of waiting for the lock to open. The maximum Time Delay is forty (40) minutes

   a. Time Window: A time period for entering the code (s) to open lock after Time Delay. The maximum Time Window is twenty (20) minutes.
   b. Enter Super Code and hold down last digit of code until two beeps sound.
   c. Press button "9". One beep sounds.
   d. Enter a six (6) digit number in the range of 001001 - 040020. One beep sounds.
      - The first 3 digits are for the Time Delay.
      - The second 3 digits are for the Time Window.
      - For example, enter 015003, to set below;
      - A fifteen (15) minute Time Delay and a three (3) minute Time Window.

7. Cancel Time Delay and Time Window
   a. Enter Super Code and hold down last digit of code until two beeps sound.
   b. Press button "9". One beep sounds.
   c. Enter a six (6) digit number 000000. One beep sounds.
      - The first 3 digits of 000) are to cancel the Time Delay.
      - The second 3 digits (000) are to cancel the Time Window.

8. Set TDO User (TDO User opens with Time Delay Override)
   a. Enter Super Code and hold down last digit of code until two beeps sound.
   b. Press button "4". One beep sounds.
   c. Enter the user ID (2~9). One beep sounds, indicating that the setting is successful.

9. Delete TDO User (No User can open with Time Delay Override)
   a. Enter Super Code and hold down last digit of code until two beeps sound.
   b. Press button "4". One beep sounds.
   c. Press button "0". One beep sounds.

10. Audit (Optional USB Adaptor & Software Needed.)
    a. Connect the USB Adaptor to the entrypad.
    b. Enter Super Code and hold down last digit of code until two beeps sound.
    c. Press button "7". One beep sounds, followed by one more beep indicating that the extracting is successful.
    Note:
    - Use one USB Adaptor to extract the audit from one lock only.
    - The USB Adaptor saves only one lock's audit.

Follow the "Audit Kit" software instructions to export the audit.
